EXPERIENCE

• INDMoney - Super Money App (20M+ users)

Product Manager (Full-time)

Jun 2023 - May 2026

Built 6 products 0→1 across Insurance, Wealth & AI at scale. Owned discovery, roadmap, GTM and CRM workflows. Led a team of 5+. Products impacted 4M+ users with \$120K+ MRR and 1.3× ARPU lift.

- **Life Insurance:** Built 3rd largest digital aggregator by revenue in India. Integrated ICICI, Bajaj, TATA, Max. Achieved highest funnel conversions in India. End-to-end CRM integration supporting 50+ sales agents.
- **INDwheels (Vehicle Tracking + Motor Insurance):** Built feature to track vehicles, monitor current value, insurance, PUC, FASTag and challans. Tracked 1M+ vehicles. Launched motor insurance aggregation with TATA, ICICI, GoDigit, Kotak. Achieved highest conversion rates in industry.
- **AI Insurance Agent:** Built an end-to-end agentic insurance assistant for cover recommendations, real-time quote fetching, plan comparison, proposal filling and payment handoff; improved DIY funnel completion and reduced support queries by 20%.
- **Priority Circle (Premium Product):** Built member-only experience for UHNI users with Private Banker assignment, financial planning and appointment booking journeys across app & LMS. Achieved 2.5× higher ARPU vs regular users.

• Monster.com/foundit (90M+ users)

Product Intern (Full-time)

April 2023 - May 2023

- Managed testing workflows and quality assurance processes. Utilized SQL and Grafana for data analysis and monitoring. Conducted manual and API testing. Tracked and managed bugs using JIRA.

• Physicswallah - EdTech Unicorn

Product Quality Intern (Full-time)

Jun 2022 - Aug 2022

- Ensured quality of educational content by conducting rigorous checks. Collaborated with top educators to gather feedback and implemented enhancements. Worked on improving user experience and platform quality.

• 8Bins - Waste Management Services

Co-Founder

Aug 2020 - Dec 2021

- Conceptualised and developed an IoT-enabled smart waste management system utilising SmartBins and advanced computer vision for waste classification. Designed robust business model and GTM strategy. Top 10 in NASSCOM CienaHack 2020. Selected for PadUp Ventures' mentorship cohort.

PROJECTS

- **GPU Inference - H100 Serving** : Rented an NVIDIA H100 and benchmarked LLM serving (Qwen2.5-7B on vLLM) to model GPUaaS unit economics end to end. Measured a 45× cost per token swing driven purely by GPU utilization, mapped the throughput vs latency saturation curve, and showed shared prefix agentic workloads exceed synthetic peak throughput via prefix caching (114× speedup on a 240 request batch).
- **Arbiter - Agentic Trading Decision System:** Agentic trading copilot that converts each trade idea into a structured decision card covering thesis, risk, invalidation levels, live market context and post trade feedback. Built the agent harness and the end-to-end decision workflow.
- **SunSeat - Route-based Seat Recommendation Engine:** A route based seat recommendation engine built with Python and FastAPI that combines route geometry, departure time and real solar-position math to suggest the least sunny seat for a car ride. Exposed as a productised API with a UI and an exposure scoring model.
- **NSE/BSE Market Intelligence Automation:** An automated Indian-market scanner for Nifty 50, Bank Nifty and their constituents, combining technical signals, sector context, fundamentals and pre-market cues into actionable daily watchlists using Python and live market data.
- **AI Models vs Developer Activity:** A time-series research project using the GitHub Archive data and Python to analyze whether frontier LLM releases correlate with changes in GitHub commit activity and developer behaviour patterns.

SKILLS SUMMARY

- Product Management & Strategy | Roadmapping & Prioritization | GTM | A/B Testing & Experimentation | System Design | APIs & Integrations
- RAG | LLM & Agentic Workflows | Multi-agent Systems | MCP | Context & Prompt Engineering | Evals & LLM Observability | Fine-tuning & Post-training | LLM Serving & Inference | GPU Benchmarking
- Python | SQL | C++ | LangGraph | Git | Figma | Jira | Mixpanel | Grafana | Codex | Claude Code | vLLM | LangSmith | Vector DBs (pgvector, Pinecone)

EDUCATION

- **NSIT Delhi (Among top 15 Engineering Colleges in India)** New Delhi, India
Bachelor of Technology - Electrical Engineering | CGPA: 7.3 (Top 20% in Department) July 2019 - June 2023
Relevant Courses: *Neural Networks & Fuzzy Logic applications | Computer Programming | Operating Systems | Data Structures & Algorithms | Database Management System | Signals & Systems | Microprocessor based System Design | Financial Literacy*

OTHER ACHIEVEMENTS

- Secured 2nd rank in Happiest Minds's Full Stack Developer Hackathon among 2000+ developers.
- Represented Hisar district at SFI (Swimming Federation of India) State-Level Competition.
- Competitive squash player representing club in tournaments and inter-club fixtures.
- IIT JEE: Top 1% (99.98%ile in Mathematics - City topper)
- National Cadet Corp (NCC) Air Force cadet (A certified)
